

SETTING YOUR KE7200 LAN Inspector™ TO ENGLISH LANGUAGE

Kurth Electronic KE7200 LAN Inspector testers ship from the factory set for German-language menus. Changing to English is easy -- here are the steps ...

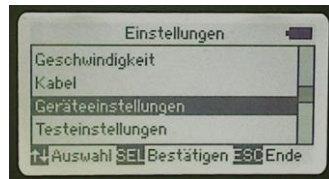

Turn on the KE7200 using the ON-OFF button. You will see the main menu or 'Hauptmenu'.

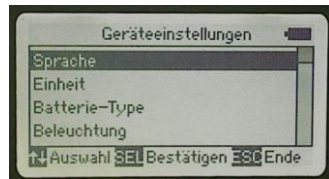

Scroll down ↓ to 'Einstellungen' or Settings and hit the SEL✓ button.

Scroll down ↓ to 'Geräteeinstellungen' or Device Settings and hit the SEL✓ button.

The top item is 'Sprache' or language. Hit the SEL✓ button and select English.

The KE7200 LAN Inspector™

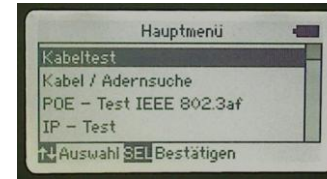

The KE7200 LAN Performance Tester is an easy-to-use electronic test tool that verifies and troubleshoots all types of Ethernet installations, from essential copper wiring tests to active IP PING. Advanced copper test capabilities include active TDR for cable length and detection of PoE including the available power in watts. The KE7200 can record test results and network configurations for download.
